PROFESSIONAL SUMMARY

Master's graduate in Control and Systems Engineering from USTHB, passionate about robotics, automated systems, and applied AI in industry and emerging technologies. My goal is to contribute to innovative projects in robotics, intelligent systems, automotive, aerospace, and Industry 4.0.

PROFESSIONAL EXPERIENCE

Teaching Assistant — Electronics & Control Department

Oct. 2025 – June 2026

Supervising coursework in sampled-data control systems, PLCs, and ROS2 robotics. Mentoring practical engineering student projects.

Head of R&D / Embedded Systems Engineer

2025 – Present

Development of SYTRAC (SYTRAC ITS) intelligent traffic regulation and Smart City solution: IoT sensor integration, real-time embedded control, and automated supervision.

After-Sales Technical Specialist

Sept. 2025 – Oct. 2025

Diagnostics, maintenance, and repair of electronic equipment, testing benches, and embedded control circuit boards.

EDUCATION & DEGREES

Master's Degree in Control & Systems Engineering — USTHB — University of Sciences and Technology Houari Boumediene

2023 – 2025

Master's Thesis: Design, construction, and control of a Delta parallel robot. Kinematic modeling, Simulink simulation, and closed-loop control.

Bachelor's Degree in Control Engineering — USTHB

2021 – 2023

Academic Project: Study and design of an automated conveyor system for electrostatic sorting of precious materials.

TECHNICAL SKILLS

ROBOTICS

ROS2, Delta Parallel Robot, Forward/Inverse Kinematics, 3D Motion Planning

AUTOMATION

Siemens TIA Portal, Industrial PLCs, Ladder Logic, PID Tuning, Grafcet

EMBEDDED SYSTEMS

C/C++, Python, STM32, Arduino, Embedded Linux, IoT, Smart Sensors

SIMULATION & CAD

MATLAB/Simulink, SolidWorks 3D, Three.js, Gazebo, Proteus
